### PALATINE SHED & FENCE PAINT

#### Product Description

Palatine Professional Shed & Fence paint is a solvent-borne, Linoleic Rich, matt, oil based coating for sheds, fences and correctly prepared outdoor wood. This product is formulated as a superior alternative to shorter term products where initial appearance and costs often outweigh performance and opacity. Professional Shed & Fence paint provides a durable long term protective coating suitable for exterior use on most types of wood. Furthermore, due to its self-finishing nature, our Shed & Fence paint does not require a primer in order to be applied.

#### Pack Sizes with Product Order Codes

1 Litre	W0071.0
2.5 Litre	W0072.5
5 Litre	W007

#### How to Apply

Stir the paint with a drill stirrer or wooden baton at least 2" wide. Apply by brush, solvent resistant roller or spray. The product must be thoroughly stirred to give a uniform consistency prior to application. It is recommended that the contents are stirred periodically during application to avoid settlement. Palatine Professional Shed & Fence is supplied at the correct viscosity for direct brush application. If thinning is required use Palatine White Spirit. See the detailed TDS for further information on preceding and subsequent coatings. If applying to pressure treated or previously painted timber, please carry out a small test patch for compatibility and that adhesion is achieved. In order to obtain the best results it is important that the correct rate of application is achieved. The minimum application temperature is 10°C. For very porous timber you will require a solvent based sealer, this will avoid colour inconsistency when resin is absorbed into the surface at inconsistent levels. The required thickness of the coating may be built up by successive applications when the previous coat is completely dry. Clean tools and equipment with Palatine White Spirit.

#### Packaging Disposal

Completely emptied packaging should be put in recycling skips or appropriate container. Packaging which are not empty should be disposed of as special refuse. Please consult the relevant waste authority for clarification.
