

SAFETY DATA SHEET

345/Q142 - SQUASH COURT PAINT

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

SECTION 1: Identification of the	SECTION 1: Identification of the substance/mixture and of the company/undertaking		
1.1. Product identifier			
Product name	345/Q142 - SQUASH COURT PAINT		
Product number	345/Q142/1		
1.2. Relevant identified uses o	f the substance or mixture and uses advised against		
Identified uses	AS A COATING FOR NON-PLAYING SURFACES		
Uses advised against	No specific uses advised against are identified.		
1.3. Details of the supplier of the supplier of the supplier of the supplier of the supplication of the su	ne safety data sheet		
Supplier	COO-VAR Lockwood Street Hull HU2 0HN +44 (0) 1482 328053(T) +44 (0) 1482 219266(F) info@coo-var.co.uk		
Contact person	Technical Department -, 08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri, as above		
1.4. Emergency telephone nur	nber		
Emergency telephone	+44 (0) 1482 328053 Coo-Var (08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)		
SDS No.	10762		
SECTION 2: Hazards identification			
2.1. Classification of the substance or mixture			
Classification (EC 1272/2008)			
Physical hazards	Flam. Liq. 3 - H226		
Health hazards	Not Classified		
Environmental hazards	Not Classified		
Classification (67/548/EEC or 1999/45/EC)	-		
2.2. Label elements			
Hazard pictograms			

Signal word

Warning

345/Q142 - SQUASH COURT PAINT

Hazard statements	EUH208 Contains 2-BUTANONE OXIME. May produce an allergic reaction. H226 Flammable liquid and vapour.
Precautionary statements	 P101 If medical advice is needed, have product container or label at hand. P102 Keep out of reach of children. P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No smoking. P261 Avoid breathing vapour/ spray. P273 Avoid release to the environment. P280 Wear protective gloves/ protective clothing/ eye protection/ face protection. P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing. Rinse skin with water or shower. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P501 Dispose of contents/ container in accordance with national regulations.
Supplemental label information	EUH066 Repeated exposure may cause skin dryness or cracking.
Supplementary precautionary statements	P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish. P403+P235 Store in a well-ventilated place. Keep cool.

2.3. Other hazards

This substance is not classified as PBT or vPvB according to current EU criteria.

SECTION 3: Composition/information on ingredients		
3.2. Mixtures		
Calcium Carbonate		10-30%

Composition comments The product contains organic solvents.

SECTION 4: First aid measures

4.1. Description of first aid me	asures
General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.
Skin contact	Rinse with water.
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.
Protection of first aiders	First aid personnel should wear appropriate protective equipment during any rescue.
4.2. Most important symptoms	and effects, both acute and delayed
General information	See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system. During application and drying, solvent vapours will be emitted. Vapours in high concentrations are narcotic.
Ingestion	Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.
Skin contact	Prolonged contact may cause dryness of the skin. Discoloration of the skin.
Eye contact	May cause temporary eye irritation.
4.3. Indication of any immedia	te medical attention and special treatment needed
Notes for the doctor	Treat symptomatically.
SECTION 5: Firefighting meas	ures
5.1. Extinguishing media	
Suitable extinguishing media	Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire- extinguishing media suitable for the surrounding fire.
Unsuitable extinguishing media	Do not use water jet as an extinguisher, as this will spread the fire.
5.2. Special hazards arising from	om the substance or mixture
Specific hazards	FLAMMABLE. Solvent vapours may form explosive mixtures with air. Containers can burst violently or explode when heated, due to excessive pressure build-up.
Hazardous combustion products	Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.

tirefighting water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or split has not ignited, use water spray to disperse vapours and protect men stopping the leak. Special protective equipment Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents. SECTION 6: Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear portective clothing as described in this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Nash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Provide adequate ventilation. 6.3. Methods and material for containment and cleaning up Wear portective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal, containers and sael securely. Label the containiners containing waste and contaminated material and remove from the area as soon as possible. Flush contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste	5.3. Advice for firefighters	
for firefighters clothing. Firefighter's clothing conforming to European standard EN469 (including helmets, protective boots and gloves) will provide a basic level of protection for chemical incidents. SECTION 6: Accidental release measures 6.1. Personal precautions, protective equipment and emergency procedures Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughy after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Provide adequate ventilation. 6.2. Environmental precautions Avoid discharge into drains or watercourses or onto the ground. 6.3. Methods and material for containment and cleaning up immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plently of water. Wash thoroughy after dealing with a spillage. For waste disposal, see Section 13. SECTION 7: Handling and storage For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Sect	Protective actions during firefighting	water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use
6.1. Personal precautions, protective equipment and emergency procedures Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in bits safety data sheet. Vash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Provide adequate ventilation. 6.2. Environmental precautions Avoid discharge into drains or watercourses or onto the ground. 6.3. Methods and material for containment and cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated and contaminated materials and remove from the area as soon as possible. Flush contaminated actonatinited materials. See Section 12 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13. 6.4. Reference to other sections Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Weap awy from food, drink and animal feeding stuffs. Handle all packages and containers certailly to minimise spills. Keep container tighty sealed when not in use. Avoid the format	Special protective equipment for firefighters	clothing. Firefighter's clothing conforming to European standard EN469 (including helmets,
Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in this safety data sheet. Kelsh thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Provide adequate ventilation. 6.2. Environmental precautions Avoid discharge into drains or watercourses or onto the ground. 6.3. Methods and material for containment and cleaning up Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Small Spillages: Collect spillage. Large Spillages: Absorb spillage with non-combustible, absorbent material. The contaminated absorbent may pose the same hazard as the spilled material. Collect and place in suitable waste disposal containers and seal security. Label the containers containing waste and contaminated materials and remove from the area as soon as possible. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. For waste disposal, see Section 13. 6.4. Reference to other sections For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13. SECTION 7: Handling and storage Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containeris container tighty sealed when not in use. Avoid the formation of mists. 7.2. Conditions for safe storage, including any incompatibilities	Advice on general occupational hygiene	contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change
	7.2. Conditions for safe storag	e, including any incompatibilities

Storage precautionsStore away from incompatible materials (see Section 10). Keep only in the original container.
Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect
containers from damage. Bund storage facilities to prevent soil and water pollution in the
event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.

Storage class	Flammable liquid storage. The storage and use of this product is subject to the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR). The requirements are given in the HSE Approved Code of Practice and Guidance, Storage of Dangerous Substances: DSEAR. Up to 250 litres of liquids with a flashpoint above 32C but below 55C may be kept in a workroom provided they are kept in closed containers in a marked, fire-resisting cupboard or bin. Larger quantities must be kept in a separate , marked storeroom conforming to the structural requirements contained in the HSE guidance note Storage of Flammable Liquids in Containers.
7.3. Specific end use(s)	
Specific end use(s)	The identified uses for this product are detailed in Section 1.2.
Usage description	Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible.

SECTION 8: Exposure controls/Personal protection

8.1. Control parameters

Occupational exposure limits

Calcium Carbonate

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

kaolin

Long-term exposure limit (8-hour TWA): WEL 2 mg/m³

BUTANOL-norm

Short-term exposure limit (15-minute): WEL 50 ppm 154 mg/m³ Sk

Cobalt bis(2-ethylhexanoate)

Long-term exposure limit (8-hour TWA): WEL 0.1 mg/m³ as Co

Naphtha (Petroleum), hydro treated heavy

Long-term exposure limit (8-hour TWA): WEL 50 ppm 274 mg/m³ Short-term exposure limit (15-minute): WEL 100 ppm 548 mg/m³ WEL = Workplace Exposure Limit Sk = Can be absorbed through the skin.

HYDROCARBONS, C9-C11, <2% AROMATICS

DNEL	Industry - Inhalation; Long term systemic effects: 1500 mg/m ³ Consumer - Oral; Long term systemic effects: 300 mg/kg/day Consumer - Dermal; Long term systemic effects: 300 mg/kg/day Industry - Dermal; Long term systemic effects: 300 mg/kg/day Consumer - Inhalation; Long term systemic effects: 900 mg/m ³
PNEC	No PNEC available. Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for the risk assessment of this complex substance.
	BUTANOL-norm (CAS: 71-36-3)
DNEL	Workers - Inhalation; Long term local effects: 310 mg/m ³ Consumer - Oral; Long term systemic effects: 3.125 mg/kg/day Consumer - Inhalation; Long term local effects: 55 mg/m ³

	Cobalt bis(2-ethylhexanoate) (CAS: 136-52-7)
DNEL	General population - Oral; Long term systemic effects: 0.175 mg/kg General population - Inhalation; Long term local effects: 0.037 mg/m ³ Workers - Inhalation; Long term local effects: 0.235 mg/m ³
PNEC	Fresh water; 0.0006 Co mg/l marine water; 0.00236 Co mg/l STP; 0.37 Co mg/kg Sediment (Freshwater); 53 Co mg/l Sediment (Marinewater); 69.8 Co mg/l Soil; 10.9 Co mg/kg/day
8.2. Exposure controls	
Protective equipment	
Appropriate engineering controls	Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.
Hand protection	To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturer's performance data suggest that the optimum glove for use should be: Wear protective gloves made of the following material: Nitrile rubber. Thickness: ≥ 0.31 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.
Other skin and body protection	Wear appropriate clothing to prevent repeated or prolonged skin contact.
Hygiene measures	Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Wash contaminated clothing before reuse.

Respiratory protection	Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a respirator fitted with the following cartridge: Gas filter, type A2.
Environmental exposure controls	Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1. Information on basic physical and chemical properties		
Appearance	Coloured liquid.	
Colour	White.	
Odour	Hydrocarbons.	
Odour threshold	Not determined.	
рН	Technically not feasible.	
Melting point	Not determined.	
Initial boiling point and range	Not determined.	
Flash point	~ 38°C Closed cup.	
Evaporation rate	Not determined.	
Evaporation factor	Not determined.	
Flammability (solid, gas)	Not determined.	
Upper/lower flammability or explosive limits	Not determined.	
Other flammability	Not determined.	
Vapour pressure	Not determined.	
Vapour density	heavier than air	
Relative density	1.61	
Bulk density	Not determined.	
Solubility(ies)	Insoluble in water	
Partition coefficient	Not determined.	
Auto-ignition temperature	Not determined.	
Decomposition Temperature	Not determined.	
Viscosity	Kinematic viscosity > 20.5 mm²/s.	
Explosive properties	Not determined.	
Explosive under the influence of a flame	Not considered to be explosive.	

Oxidising properties	Not determined.
9.2. Other information	
Volatile organic compound	This product contains a maximum VOC content of <500 g/litre.
SECTION 10: Stability and re	eactivity
10.1. Reactivity	
Reactivity	See the other subsections of this section for further details.
10.2. Chemical stability	
Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
10.3. Possibility of hazardous	s reactions
Possibility of hazardous reactions	The following materials may react strongly with the product: Oxidising agents.
10.4. Conditions to avoid	
Conditions to avoid	Avoid heat, flames and other sources of ignition. Containers can burst violently or explode when heated, due to excessive pressure build-up. Static electricity and formation of sparks must be prevented.
10.5. Incompatible materials	
Materials to avoid	Oxidising materials. Acids - oxidising.
10.6. Hazardous decomposit	tion products
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
SECTION 11: Toxicological i	information
11.1. Information on toxicolo	gical effects
Toxicological effects	There is no data available on the mixture itself. The mixture has been assessed following the EC 1272/2008 regulation and classified for toxicological hazards accordingly. See Sections 2 and 3 for details.
Carcinogenicity IARC carcinogenicity	None of the ingredients are listed or exempt.
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system. During application and drying, solvent vapours will be emitted. In high concentrations, vapours are narcotic and may cause headache, fatigue, dizziness and nausea.
Ingestion	Symptoms following overexposure may include the following: Nausea, vomiting. Diarrhoea.
Skin contact	The product contains organic solvents. May be absorbed through the skin. Acts as a defatting agent on skin. May cause cracking of skin, and eczema.
Eye contact	May cause temporary eye irritation.
Medical considerations	Skin disorders and allergies. Avoid vomiting and stomach flushing because of the risk of aspiration.
Toxicological information on	inaredients.

Toxicological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Acute toxicity - oral		
Acute toxicity oral (LD₅₀ mg/kg)	5,100.0	
Species	Rat	
ATE oral (mg/kg)	5,100.0	
Acute toxicity - dermal		
Acute toxicity dermal (LD₅ mg/kg)	5,100.0	
Species	Rabbit	
ATE dermal (mg/kg)	5,100.0	
Acute toxicity - inhalation		
Acute toxicity inhalation (LC₅ vapours mg/l)	5,100.0	
Species	Rat	
ATE inhalation (vapours mg/l)	5,100.0	
Skin corrosion/irritation		
Skin corrosion/irritation	Not irritating.	
Serious eye damage/irritati	on	
Serious eye damage/irritation	Not irritating.	
Respiratory sensitisation		
Respiratory sensitisation	Not sensitising.	
Skin sensitisation		
Skin sensitisation	Not sensitising.	
Germ cell mutagenicity		
Genotoxicity - in vitro	Chromosome aberration: Negative. This substance has no evidence of mutagenic properties.	
Carcinogenicity		
Carcinogenicity	Based on available data the classification criteria are not met.	
Reproductive toxicity		
Reproductive toxicity - fertility	Fertility: - , Inhalation, Rat This substance has no evidence of toxicity to reproduction.	
Reproductive toxicity - development	Developmental toxicity: - : , Inhalation, Rat This substance has no evidence of toxicity to reproduction.	
Specific target organ toxicity - repeated exposure		
STOT - repeated exposure	Not available.	
Aspiration hazard		
Aspiration hazard	Kinematic viscosity <= 20.5 mm2/s.	

	Inhalation	Vapours may cause drowsiness and dizziness. Central nervous system depression.		
	Ingestion	Harmful: danger of serious damage to health by prolonged exposure if swallowed.		
	Skin contact	Product has a defatting effect on skin. May cause allergic contact eczema.		
	Eye contact	No specific health hazards known.		
	Route of exposure	Inhalation Dermal		
	Cobalt bis(2-ethylhexanoate)			
	Acute toxicity - oral			
	Acute toxicity oral (LD₅₀ mg/kg)	3,129.0		
	Species	Rat		
	ATE oral (mg/kg)	3,129.0		
SECTION 12: Ecological information				
Ecotoxicity	y There is no data available on the mixture itself. The mixture has been assessed following the EC 1272/2008 regulation and classified for toxicological hazards accordingly.			
12.1. Toxicity Ecological information on ingredients.				
		HYDROCARBONS, C9-C11, <2% AROMATICS		
	Acute aquatic toxicity			
	Acute toxicity - fish	LC50, > 96 hours: 1000 mg/l, Oncorhynchus mykiss (Rainbow trout) Substance did not cause acute toxicity to fish		
	Acute toxicity - aquatic invertebrates	Substance did not cause acute toxicity to the freshwater invertebrates EC_{50} , 48 hours: >1000 mg/l, Daphnia magna		
	Acute toxicity - aquatic plants	EC_{50} , > 72 hours: 1000 mg/l, Freshwater algae Substance did not cause acute toxicity to the freshwater green algae		
	Acute toxicity - microorganisms	EC₅₀, >: 100 mg/l, Activated sludge		
	Chronic aquatic toxicity			
	Chronic toxicity - fish early life stage	NOEC, 28 days: 0.131 mg/l, Oncorhynchus mykiss (Rainbow trout)		
	Chronic toxicity - aquatic invertebrates	NOEC, 28 days: 0.23 mg/l, Daphnia magna		
		Cobalt bis(2-ethylhexanoate)		
	Acute aquatic toxicity			
	LE(C) ₅₀	$0.1 < L(E)C50 \le 1$		
	M factor (Acute)	1		

12.2. Persistence and degradability

Persistence and degradability There are no data on the degradability of this product.

Ecological information on ingredients.

HYDROCARBONS, C9-C11, <2% AROMATICS

Persistence and degradability		The product is readily biodegradable.
Phototransformation	tion	Oxidises rapidly by photo-chemical reactions in air
Biodegradation		- 80 Degradation (%): 28 days Test - 301F Ready Biodegradability - Manometric Respiratory Test
12.3. Bioaccumulative potentia	al	
Bioaccumulative potential	No data	available on bioaccumulation.
Partition coefficient	Not dete	ermined.
Ecological information on ingre	edients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS
Bioaccumulative	potential	The product contains potentially bioaccumulating substances.
Partition coefficie	ent	log Pow: 5 - 6.7
12.4. Mobility in soil		
Mobility	Volatile surfaces	liquid. The product contains organic solvents which will evaporate easily from all s.
Ecological information on ingre	edients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS
Mobility		The product contains volatile organic compounds (VOCs) which will evaporate easily from all surfaces. Readily absorbed into soil.
Adsorption/desor coefficient	ption	Not available.
Surface tension		24.5 mN/m @ 20°C
12.5. Results of PBT and vPvB assessment		
Results of PBT and vPvB assessment	This pro	duct does not contain any substances classified as PBT or vPvB.
Ecological information on ingre	edients.	
		HYDROCARBONS, C9-C11, <2% AROMATICS
Results of PBT a assessment	nd vPvB	This substance is not classified as PBT or vPvB according to current EU criteria.
12.6. Other adverse effects		
Other adverse effects	None kn	iown.
Ecological information on ingredients.		
		HYDROCARBONS, C9-C11, <2% AROMATICS
Other adverse ef	fects	Not known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods		
General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.	
Disposal methods	Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Waste packaging should be collected for reuse or recycling. Incineration or landfill should only be considered when recycling is not feasible.	
Waste class	When this coating, in its liquid state, as supplied, becomes a waste, it is categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with code 08 01 11* (SOLVENT BASED LIQUID WASTE). If mixed with other wastes, the above waste code may not be applicable. Used containers, drained and/or rigorously scraped out and containing dry residues of the supplied coating, are categorised as non-hazardous waste, with code 15 01 02 (plastic packaging) or 15 01 04 (metal packaging).	
SECTION 14: Transport inform	ation	
General	For limited quantity packaging/limited load information, consult the relevant modal documentation using the data shown in this section.	
14.1. UN number		
UN No. (ADR/RID)	1263	
UN No. (IMDG)	1263	
UN No. (ICAO)	1263	
14.2. UN proper shipping name		
Proper shipping name (ADR/RID)	PAINT, Contains Low Aromatic White Spirit, Class 3, PG III, (38 °C c.c.)	
Proper shipping name (IMDG)	PAINT	
Proper shipping name (ICAO)	PAINT	
14.3. Transport hazard class(es)		
ADR/RID class	3	
IMDG class	3	
Transport labels		

3

ADR/RID packing group	
IMDG packing group	Ш
ICAO packing group	Ш

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant No.

14.6. Special precautions for user

Always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

EmS F-E, S-E

Tunnel restriction code (D/E)

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

EU legislationRegulation (EC) No 1907/2006 of the European Parliament and of the Council of 18
December 2006 concerning the Registration, Evaluation, Authorisation and Restriction of
Chemicals (REACH) (as amended).
Commission Regulation (EU) No 2015/830 of 28 May 2015.
Regulation (EC) No 1272/2008 of the European Parliament and of the Council of 16
December 2008 on classification, labelling and packaging of substances and mixtures (as
amended).

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

Inventories

EU - EINECS/ELINCS

None of the ingredients are listed or exempt.

SECTION 16: Other information

Abbreviations and acronyms used in the safety data sheet	 ADR: European Agreement concerning the International Carriage of Dangerous Goods by Road. ADN: European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways. RID: European Agreement concerning the International Carriage of Dangerous Goods by Rail. IATA: International Air Transport Association. ICAO: Technical Instructions for the Safe Transport of Dangerous Goods by Air. IMDG: International Maritime Dangerous Goods. CAS: Chemical Abstracts Service. ATE: Acute Toxicity Estimate. LCso: Lethal Concentration to 50 % of a test population. LDso: Lethal Dose to 50% of a test population (Median Lethal Dose). ECso: 50% of maximal Effective Concentration. PBT: Persistent, Bioaccumulative and Toxic substance. vPvB: Very Persistent and Very Bioaccumulative.
Classification abbreviations and acronyms	Acute Tox. = Acute toxicity Aquatic Acute = Hazardous to the aquatic environment (acute) Aquatic Chronic = Hazardous to the aquatic environment (chronic) Asp. Tox. = Aspiration hazard Flam. Liq. = Flammable liquid STOT RE = Specific target organ toxicity-repeated exposure STOT SE = Specific target organ toxicity-single exposure
Classification procedures according to Regulation (EC) 1272/2008	STOT SE 3 - H336, STOT RE 1 - H372: Calculation method. Aquatic Chronic 3 - H412: Calculation method. Flam. Liq. 3 - H226: Expert judgement.
Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Revision comments	Issued in new format for Reach compliance in accordance with EC 1272/2008 Issued in accordance with Annex II to REACH, as amended by Commission Regulation (EU) No. 2015/830 Revised formulation. Revisions to Sections (2),(3),(8),(15), and (16) - reclassification of resin components. Revision to sections 2, 8, 11 & 12 for reclassification of solvents.
Issued by	Technical Dept. (P.E.)
Revision date	21/10/2019
Revision	10.0
Supersedes date	20/08/2019
SDS number	10762
SDS status	Approved.

Hazard statements in full	 H226 Flammable liquid and vapour. H302 Harmful if swallowed. H304 May be fatal if swallowed and enters airways. H312 Harmful in contact with skin. H315 Causes skin irritation. H317 May cause an allergic skin reaction. H318 Causes serious eye damage. H319 Causes serious eye irritation. H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness. H351 Suspected of causing cancer. H360 May damage fertility or the unborn child. H400 Very toxic to aquatic life. H412 Harmful to aquatic life with long lasting effects. EUH208 Contains 2-BUTANONE OXIME. May produce an allergic reaction.
