

# PAINTS, PRIMERS AND SPECIALISED COATINGS

# SAFETY DATA SHEET

### 348/G150 - BRICK AND TILE PAINT GLOSS RED

According to Regulation (EC) No 1907/2006, Annex II, as amended. Commission Regulation (EU) No 2015/830 of 28 May 2015.

### SECTION 1: Identification of the substance/mixture and of the company/undertaking

### 1.1. Product identifier

Product name 348/G150 - BRICK AND TILE PAINT GLOSS RED

Product number 348/G150/65

**UFI** UFI: CE9P-X2WU-P002-9G6M

### 1.2. Relevant identified uses of the substance or mixture and uses advised against

**Identified uses** Paint.

### 1.3. Details of the supplier of the safety data sheet

Supplier COO-VAR TEAL & MACKRILL EU B.V.

 Lockwood Street
 Zandvoortstraat 69

### 1.4. Emergency telephone number

Emergency telephone +44 (0) 1482 328053 Coo-Var (08.30 - 16.30 hrs Mon - Thurs, 08.30 - 15.00 hrs Fri)

**SDS No.** 10582

### **SECTION 2: Hazards identification**

### 2.1. Classification of the substance or mixture

Classification (EC 1272/2008)

Physical hazards Flam. Liq. 3 - H226

Health hazards STOT SE 3 - H336

**Environmental hazards** Aquatic Chronic 3 - H412

2.2. Label elements

## 348/G150 - BRICK AND TILE PAINT GLOSS RED

## Hazard pictograms

Signal word Warning

Hazard statements H226 Flammable liquid and vapour.

H336 May cause drowsiness or dizziness.

H412 Harmful to aquatic life with long lasting effects.

Precautionary statements P101 If medical advice is needed, have product container or label at hand.

P102 Keep out of reach of children.

P210 Keep away from heat, hot surfaces, sparks, open flames and other ignition sources. No

smoking.

P261 Avoid breathing vapour/ spray.

P271 Use only outdoors or in a well-ventilated area.

P273 Avoid release to the environment.

P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.

P303+P361+P353 IF ON SKIN (or hair): Take off immediately all contaminated clothing.

Rinse skin with water or shower.

P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove

contact lenses, if present and easy to do. Continue rinsing.

P501 Dispose of contents/ container in accordance with national regulations.

Supplemental label

information

EUH066 Repeated exposure may cause skin dryness or cracking.

Contains HYDROCARBONS, C9-C11, <2% AROMATICS

Supplementary precautionary

statements

P304+P340 IF INHALED: Remove person to fresh air and keep comfortable for breathing. P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog to extinguish.

P403+P235 Store in a well-ventilated place. Keep cool.

### 2.3. Other hazards

This product does not contain any substances classified as PBT or vPvB.

## SECTION 3: Composition/information on ingredients

## 3.2. Mixtures

### HYDROCARBONS, C9-C11, <2% AROMATICS

# SECTION 4: First aid measures

### 4.1. Description of first aid measures

General information Move affected person to fresh air and keep warm and at rest in a position comfortable for

breathing. Never give anything by mouth to an unconscious person.

Inhalation Remove affected person from source of contamination. Move affected person to fresh air and

keep warm and at rest in a position comfortable for breathing. Get medical attention if any discomfort continues. Place unconscious person on their side in the recovery position and

ensure breathing can take place.

**Ingestion** DO NOT induce vomiting. Get medical attention immediately. Move affected person to fresh

air and keep warm and at rest in a position comfortable for breathing.

Skin contact Remove affected person from source of contamination. Remove contaminated clothing

immediately and wash skin with soap and water.

Eye contact Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 15

minutes and get medical attention.

### 4.2. Most important symptoms and effects, both acute and delayed

General information Get medical attention promptly if symptoms occur after washing.

# 4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor No specific recommendations.

### SECTION 5: Firefighting measures

# 5.1. Extinguishing media

Suitable extinguishing media Extinguish with foam, carbon dioxide, dry powder or water fog. Do not use water jet as an

extinguisher, as this will spread the fire.

## 5.2. Special hazards arising from the substance or mixture

Specific hazards Toxic gases or vapours. FLAMMABLE. Solvent vapours may form explosive mixtures with air.

5.3. Advice for firefighters

Protective actions during

firefighting

Risk of re-ignition after fire has been extinguished. Cool containers exposed to flames with water until well after the fire is out. Avoid the spillage or runoff entering drains, sewers or

watercourses.

Special protective equipment

for firefighters

Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective

clothing.

### SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

### Personal precautions

Avoid inhalation of vapours and contact with skin and eyes. Provide adequate ventilation. No smoking, sparks, flames or other sources of ignition near spillage. Ensure suitable respiratory protection is worn during removal of spillages in confined areas.

### 6.2. Environmental precautions

### **Environmental precautions**

Avoid discharge into drains or watercourses or onto the ground. Contain spillage with sand, earth or other suitable non-combustible material. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.

### 6.3. Methods and material for containment and cleaning up

### Methods for cleaning up

Eliminate all sources of ignition. No smoking, sparks, flames or other sources of ignition near spillage. Provide adequate ventilation. Avoid the spillage or runoff entering drains, sewers or watercourses. Absorb in vermiculite, dry sand or earth and place into containers. Collect and place in suitable waste disposal containers and seal securely. For waste disposal, see Section 13

#### 6.4. Reference to other sections

Reference to other sections

For personal protection, see Section 8.

### SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

### Usage precautions

Observe any occupational exposure limits for the product or ingredients. Avoid inhalation of vapours and spray/mists. Keep away from heat, sparks and open flame. Avoid spilling. Avoid contact with skin and eyes. Provide adequate ventilation. Avoid inhalation of vapours. Use approved respirator if air contamination is above an acceptable level. Do not eat, drink or smoke when using the product. The Manual Handling Operations Regulations may apply to the handling of containers of this product. To assist employers, the following method of calculating the weight for any pack size is given. Take the pack size volume in litres and multiply this figure by the specific gravity value given in section 9. This will give the net weight of the coating in kilograms. Allowance will then have to be made for the immediate packaging to give an approximate gross weight.

### 7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

Store in closed original container at temperatures between 5°C and 25°C. Keep away from heat, sparks and open flame. Keep container tightly closed. Keep containers upright. Store away from the following materials: Oxidising materials. Alkalis. Acids.

### Storage class

Flammable liquid storage. The storage and use of this product is subject to the Dangerous Substances and Explosive Atmospheres Regulations (DSEAR). The requirements are given in the HSE Approved Code of Practice and Guidance, Storage of Dangerous Substances: DSEAR. Up to 250 litres of liquids with a flashpoint above 32C but below 55C may be kept in a workroom provided they are kept in closed containers in a marked, fire-resisting cupboard or bin. Larger quantities must be kept in a separate, marked storeroom conforming to the structural requirements contained in the HSE guidance note Storage of Flammable Liquids in Containers.

### 7.3. Specific end use(s)

Specific end use(s)

The identified uses for this product are detailed in Section 1.2.

### Usage description

Collect and place in suitable waste disposal containers and seal securely. Label the containers containing waste and contaminated materials and remove from the area as soon as possible.

### SECTION 8: Exposure controls/Personal protection

### 8.1. Control parameters

### Occupational exposure limits

### Calcium Carbonate

Long-term exposure limit (8-hour TWA): WEL 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust

#### Red Iron Oxide

Long-term exposure limit (8-hour TWA): WEL 4 mg/m³ respirable dust Short-term exposure limit (15-minute): WEL 10 mg/m³

as Fe

### **Barium Sulphate**

Long-term exposure limit (8-hour TWA): 10 mg/m³ inhalable dust Long-term exposure limit (8-hour TWA): 4 mg/m³ respirable dust

### TRIZINC BIS(ORTHOPHOSPHATE)

Long-term exposure limit (8-hour TWA): 10 mg/m<sup>3</sup>

### Hydrocarbons, C10-C13, n-alkanes, isoalkanes, cyclics, <2% aromatics

Long-term exposure limit (8-hour TWA): WEL 1000 mg/m<sup>3</sup>

# Dipropylene Glycol Methyl Ether

Long-term exposure limit (8-hour TWA): WEL 50 ppm 308 mg/m³ Sk

### PHTHALIC ANHYDRIDE

Long-term exposure limit (8-hour TWA): WEL 4 mg/m3(Sen) Short-term exposure limit (15-minute): WEL 12 mg/m3(Sen)

WEL = Workplace Exposure Limit. Sk = Can be absorbed through skin.

### HYDROCARBONS, C9-C11, <2% AROMATICS

**DNEL** Industry - Inhalation; Long term systemic effects: 1500 mg/m³

Consumer - Oral; Long term systemic effects: 300 mg/kg/day Consumer - Dermal; Long term systemic effects: 300 mg/kg/day Industry - Dermal; Long term systemic effects: 300 mg/kg/day Consumer - Inhalation; Long term systemic effects: 900 mg/m³

PNEC No PNEC available. Substance is a hydrocarbon UVCB. Standard tests for this

endpoint are intended for single substances and are not appropriate for the risk

assessment of this complex substance.

### TRIZINC BIS(ORTHOPHOSPHATE) (CAS: 7779-90-0)

**DNEL** - Inhalation; : 1.0 soluble Zn mg/m³

Consumer - Oral; Long term systemic effects: 0.83 mg/kg/day

- Inhalation; : 5.0 insoluble Zn mg/m3

Consumer - Inhalation; Long term systemic effects: 2.5 mg/m³ Professional - Inhalation; Long term systemic effects: 5 mg/m³ Consumer - Dermal; Long term systemic effects: 83 mg/kg/day Professional - Dermal; Long term systemic effects: 83 mg/kg/day

PNEC - Fresh water; 0.02 Zn mg/l

- marine water; 0.006 Zn mg/l

Soil; 1.06 mg/kg

Intermittent release; 0.493 mg/l

Fresh water; 0.36 mg/l marine water; 0.036 mg/l

Sediment (Freshwater); 6.37 mg/kg Sediment (Marinewater); 0.637 mg/kg

### 8.2. Exposure controls

# Protective equipment

# Appropriate engineering controls

Provide adequate ventilation. Good general ventilation should be adequate to control worker exposure to airborne contaminants. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.

### Eye/face protection

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with European Standard EN166. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

### Hand protection

To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturers' performance data suggest that the optimum glove for use should be: Wear protective gloves made of the following material: Nitrile rubber. Thickness: ≥ 0.31 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.

# Other skin and body protection

Wear appropriate clothing to prevent repeated or prolonged skin contact.

# Hygiene measures

Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Wash contaminated clothing before reuse.

### Respiratory protection

Ensure all respiratory protective equipment is suitable for its intended use and is 'CE'-marked. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with European Standard EN14387. Full face mask respirators with replaceable filter cartridges should comply with European Standard EN136. Half mask and quarter mask respirators with replaceable filter cartridges should comply with European Standard EN140. Respiratory protection must be used if the airborne contamination exceeds the recommended occupational exposure limit. Wear a respirator fitted with the following cartridge: Gas filter, type A2.

# Environmental exposure controls

Keep container tightly sealed when not in use. Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

### SECTION 9: Physical and chemical properties

### 9.1. Information on basic physical and chemical properties

Appearance Viscous liquid. Coloured liquid.

Colour Red.

Odour Organic solvents.

Odour threshold Not determined.

**pH** Technically not feasible.

**Melting point** Not determined.

### 348/G150 - BRICK AND TILE PAINT GLOSS RED

**Initial boiling point and range** Not determined.

Flash point 38 approx.°C Closed cup.

Evaporation rate Not determined.

Evaporation factor Not determined.

Upper/lower flammability or

explosive limits

: 0.8%

Other flammability Not determined.

Vapour pressure Not determined.

Vapour density heavier than air

Relative density 1.16 approximately @ @20°C

Solubility(ies) Insoluble in water

Partition coefficient Not determined.

Auto-ignition temperature Not determined.

**Decomposition Temperature** Not determined.

**Viscosity** 4.5 P @ 25°C

**Explosive properties** Not determined.

Explosive under the influence

of a flame

Not considered to be explosive.

Oxidising properties Not determined.

9.2. Other information

Volatile organic compound This product contains a maximum VOC content of max 453 g/litre.

### SECTION 10: Stability and reactivity

### 10.1. Reactivity

**Reactivity** There are no known reactivity hazards associated with this product.

10.2. Chemical stability

Stability Stable at normal ambient temperatures and when used as recommended.

# 10.3. Possibility of hazardous reactions

Possibility of hazardous

Not determined.

reactions

10.4. Conditions to avoid

Conditions to avoid Avoid heat, flames and other sources of ignition. Avoid contact with the following materials:

Acids. Oxidising agents.

10.5. Incompatible materials

Materials to avoid Strong alkalis. Strong acids. Strong oxidising agents.

### 10.6. Hazardous decomposition products

Hazardous decomposition

other toxic gases or vapours.

products

Oxides of carbon. Thermal decomposition or combustion may liberate carbon oxides and

### SECTION 11: Toxicological information

### 11.1. Information on toxicological effects

**Inhalation** Vapour from this product may be hazardous by inhalation. Vapour may irritate respiratory

system/lungs.

**Ingestion** Liquid irritates mucous membranes and may cause abdominal pain if swallowed.

Skin contact Product has a defatting effect on skin. Repeated exposure may cause skin dryness or

cracking. May cause allergic contact eczema. Prolonged or repeated exposure may cause

severe irritation.

**Eye contact** May cause temporary eye irritation.

Acute and chronic health

hazards

This product has low toxicity. Only large quantities are likely to have adverse effects on

human health.

**Route of exposure** Inhalation Skin absorption. Ingestion. Skin and/or eye contact.

**Medical considerations** Skin disorders and allergies. Avoid vomiting and stomach flushing because of the risk of

aspiration.

### Toxicological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Respiratory sensitisation Not sensitising.

### 348/G150 - BRICK AND TILE PAINT GLOSS RED

Skin sensitisation

**Skin sensitisation** Not sensitising.

Germ cell mutagenicity

Genotoxicity - in vitro Chromosome aberration: Negative. This substance has no evidence of mutagenic

properties.

Carcinogenicity

**Carcinogenicity** Based on available data the classification criteria are not met.

Reproductive toxicity

Reproductive toxicity -

fertility

Fertility: -, Inhalation, Rat This substance has no evidence of toxicity to

reproduction.

Reproductive toxicity - development

Developmental toxicity: -:, Inhalation, Rat This substance has no evidence of

toxicity to reproduction.

Specific target organ toxicity - repeated exposure

STOT - repeated exposure Not available.

**Aspiration hazard** 

**Aspiration hazard** Kinematic viscosity <= 20.5 mm2/s.

**Inhalation** Vapours may cause drowsiness and dizziness. Central nervous system depression.

Ingestion Harmful: danger of serious damage to health by prolonged exposure if swallowed.

Skin contact Product has a defatting effect on skin. May cause allergic contact eczema.

**Eye contact** No specific health hazards known.

Route of exposure Inhalation Dermal

### SECTION 12: Ecological information

**Ecotoxicity**The product contains a substance which is harmful to aquatic organisms and which may

cause long term adverse effects in the aquatic environment.

### 12.1. Toxicity

Ecological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Acute aquatic toxicity

Acute toxicity - fish LC50, > 96 hours: 1000 mg/l, Oncorhynchus mykiss (Rainbow trout)

Substance did not cause acute toxicity to fish

Acute toxicity - aquatic

invertebrates

Substance did not cause acute toxicity to the freshwater invertebrates

EC<sub>50</sub>, 48 hours: >1000 mg/l, Daphnia magna

Acute toxicity - aquatic

plants

EC<sub>50</sub>, > 72 hours: 1000 mg/l, Freshwater algae

Chronic toxicity - aquatic NOEC, 28 days: 0.23 mg/l, Daphnia magna

invertebrates

### 12.2. Persistence and degradability

Persistence and degradability The product is not expected to be biodegradable.

### Ecological information on ingredients.

# HYDROCARBONS, C9-C11, <2% AROMATICS

Persistence and degradability

The product is readily biodegradable.

Phototransformation Oxidises rapidly by photo-chemical reactions in air

Biodegradation - 80 Degradation (%): 28 days

Test - 301F Ready Biodegradability - Manometric Respiratory Test

### 12.3. Bioaccumulative potential

**Bioaccumulative potential**The product contains potentially bioaccumulating substances.

Partition coefficient Not determined.

### Ecological information on ingredients.

## HYDROCARBONS, C9-C11, <2% AROMATICS

**Bioaccumulative potential** The product contains potentially bioaccumulating substances.

Partition coefficient log Pow: 5 - 6.7

### 12.4. Mobility in soil

Mobility The product contains volatile organic compounds (VOCs) which will evaporate easily from all

surfaces.

### Ecological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Mobility The product contains volatile organic compounds (VOCs) which will evaporate

easily from all surfaces. Readily absorbed into soil.

Adsorption/desorption

coefficient

Not available.

Surface tension 24.5 mN/m @ 20°C

### 12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB

This product does not contain any substances classified as PBT or vPvB.

assessment

## Ecological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Results of PBT and vPvB This substance is not classified as PBT or vPvB according to current EU criteria.

assessment

### 12.6. Other adverse effects

Other adverse effects

The product contains volatile organic compounds (VOCs) which have a photochemical ozone

creation potential.

### Ecological information on ingredients.

### HYDROCARBONS, C9-C11, <2% AROMATICS

Other adverse effects Not known.

### **SECTION 13: Disposal considerations**

### 13.1. Waste treatment methods

**General information** Avoid the spillage or runoff entering drains, sewers or watercourses.

**Disposal methods**Dispose of waste to licensed waste disposal site in accordance with the requirements of the

local Waste Disposal Authority.

Waste class When this coating, in its liquid state, as supplied, becomes a waste, it is categorised as

hazardous waste, with code 08 01 11\* (SOLVENT BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing dried residues of the supplied coating, are categorised as hazardous waste, with code 08 01 11\* (SOLVENT BASED LIQUID WASTE). If mixed with other wastes, the above waste code may not be applicable. Used containers, drained and/or rigorously scraped out and containing dry

residues of the supplied coating, are categorised as non-hazardous waste, with code 15 01 02

(plastic packaging) or 15 01 04 (metal packaging).

### **SECTION 14: Transport information**

General This product is packed in accordance with the Limited Quantity Provisions of CDGCPL2, ADR

and IMDG.

IMDG: International Maritime Dangerous Goods.

CAS: Chemical Abstracts Service. ATE: Acute Toxicity Estimate.

LC₅o: Lethal Concentration to 50 % of a test population.

LD<sub>50</sub>: Lethal Dose to 50% of a test population (Median Lethal Dose).

EC₅: 50% of maximal Effective Concentration.

PBT: Persistent, Bioaccumulative and Toxic substance.

vPvB: Very Persistent and Very Bioaccumulative.

Classification abbreviations and acronyms

Acute Tox. = Acute toxicity

Aquatic Acute = Hazardous to the aquatic environment (acute)

Aquatic Chronic = Hazardous to the aquatic environment (chronic)

Asp. Tox. = Aspiration hazard Flam. Lig. = Flammable liquid

STOT RE = Specific target organ toxicity-repeated exposure STOT SE = Specific target organ toxicity-single exposure

Revision comments

Issued in new format for Reach compliance in accordance with EC 1272/2008 Issued in accordance with Annex II to REACH, as amended by Commission Regulation (EU) No. 2015/830 Unique Formula Identifier (UFI) added Addition of EU supplier information

**Issued by** Technical Dept. (P.E.)

Revision date 27/01/2021

Revision 8.2

Supersedes date 27/06/2019

SDS number 10582

SDS status Approved.

Hazard statements in full H226 Flammable liquid and vapour.

H302 Harmful if swallowed.

H304 May be fatal if swallowed and enters airways.

H315 Causes skin irritation.

H317 May cause an allergic skin reaction.

H318 Causes serious eye damage.

H334 May cause allergy or asthma symptoms or breathing difficulties if inhaled.

H335 May cause respiratory irritation. H336 May cause drowsiness or dizziness.

H361 Suspected of damaging fertility or the unborn child.

H400 Very toxic to aquatic life.

H410 Very toxic to aquatic life with long lasting effects. H412 Harmful to aquatic life with long lasting effects.
