SECTION 2: Hazards identific	cation		
2.1. Classification of the subs	tance or mixture		
Classification (EC 1272/2008)	2		
Physical hazards	Not Classified		
Health hazards	Skin Irrit. 2 - H315 Eye Irrit. 2 - H319 Skin Sens. 1 - H317		
Environmental hazards	Aquatic Acute 1 - H400 Aquatic Chronic 1 - H410		
Human health	The product contains a small amount of sensitising substance. May cause skin sensitisation or allergic reactions in sensitive individuals.		
Physicochemical	When handled correctly, undamaged units represent no danger.		

#### 2.2. Label elements

#### Hazard pictograms

 $\mathbf{\Lambda}$ 

Signal word	Warning
Hazard statements	H315 Causes skin irritation. H319 Causes serious eye irritation. H317 May cause an allergic skin reaction. H410 Very toxic to aquatic life with long lasting effects.

SECTION 4: First aid measure	98	
4.1. Description of first aid me	asures	
General information	Move affected person to fresh air and keep breathing. Never give anything by mouth to	o warm and at rest in a position comfortable for o an unconscious person.
Inhalation	keep warm and at rest in a position comfor	ontamination. Move affected person to fresh air and table for breathing. Get medical attention if any person on their side in the recovery position and
Ingestion	Give a few small glasses of water or milk to unconscious person. Do not induce vomitin continues.	o drink. Never give anything by mouth to an ng. Get medical attention if any discomfort
Skin contact	-	ontamination. Rinse immediately with plenty of t medical attention if irritation persists after washing
Eye contact		move any contact lenses and open eyelids wide utes. Get medical attention immediately. Continue
4.2. Most important symptoms	and effects, both acute and delayed	
General information	Get medical attention promptly if symptom	s occur after washing.
4.3. Indication of any immedia	te medical attention and special treatment ne	eeded
Notes for the doctor	No specific recommendations. If in doubt,	get medical attention promptly.
SECTION 5: Firefighting meas	sures	
5.1. Extinguishing media		
Suitable extinguishing media	-	vill burn. Use fire-extinguishing media suitable for llowing media: Water spray, fog or mist. Foam,
5.2. Special hazards arising from	om the substance or mixture	
Specific hazards	Toxic gases or vapours.	
5.3. Advice for firefighters		

Protective actions during firefighting	Avoid breathing fire gases or vapours. Containers close to fire should be removed or cooled with water.
Special protective equipment for firefighters	Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing.

SECTION 6: Accidental release measures

#### 6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions	Avoid inhalation of vapours and contact with skin and eyes. Provide adequate ventilation.
	Wear protective clothing as described in Section 8 of this safety data sheet.

#### 6.2. Environmental precautions

**Environmental precautions** Avoid discharge into drains or watercourses or onto the ground. Contain spillage with sand, earth or other suitable non-combustible material. Spillages or uncontrolled discharges into watercourses must be reported immediately to the Environmental Agency or other appropriate regulatory body.

#### 6.3. Methods and material for containment and cleaning up

Methods for cleaning up	Avoid the spillage or runoff entering drains, sewers or watercourses. Absorb in vermiculite, dry	
sand or earth and place into containers. Collect and place in suitable waste disposal	sand or earth and place into containers. Collect and place in suitable waste disposal	
	containers and seal securely. For waste disposal, see Section 13.	

#### 6.4. Reference to other sections

**Reference to other sections** For personal protection, see Section 8.

#### SECTION 7: Handling and storage

#### 7.1. Precautions for safe handling

Usage precautions	Avoid inhalation of vapours. Avoid spilling, skin and eye contact. Do not eat, drink or smoke when using the product. Good personal hygiene procedures should be implemented. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site. The Manual Handling Operations Regulations may apply to the handling of
	containers of this product. For products sold by weight refer to the guide net weight indicated on the container. Allowance will have to be made for the immediate packaging to give an approximate gross weight.

#### 7.2. Conditions for safe storage, including any incompatibilities

Storage precautionsStore in tightly closed original container in a dry, cool and well-ventilated place. Store in<br/>closed original container at temperatures between 5°C and 25°C. Protect from freezing and<br/>direct sunlight. Keep containers upright.7.3. Specific end use(s)The identified uses for this product are detailed in Section 1.2.Usage descriptionCollect and place in suitable waste disposal containers and seal securely. Label the<br/>containers containing waste and contaminated materials and remove from the area as soon<br/>as possible.

#### 8.2. Exposure controls

Protective equipment

Appropriate engineering Provide adequate ventilation. Avoid inhalation of vapours. Observe any occupational controls exposure limits for the product or ingredients. Personal protection Unprotected persons should be kept away from treated areas. Eyewear complying with an approved standard should be worn if a risk assessment indicates Eye/face protection eye contact is possible. The following protection should be worn: Chemical splash goggles. Hand protection To protect hands from chemicals, gloves should comply with European Standards EN388 and 374. As a general principle, exposure should be managed by means other than the provision of protective gloves. Manufacturers' performance data suggest that the optimum glove for use should be: Butyl rubber. Thickness: > 0.5 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 480 mins. or Nitrile rubber. Thickness: > 0.4 mm Permeation breakthrough time according to EN374 - class: (1-6) e.g. minimum 240 mins. Caution: The performance of gloves under actual working conditions can be significantly affected by many factors and the information provided according to EN374 may not accord with what is achieved in practice. We recommend that expert professional advice is sought that takes into account of the work processes and working environment applicable for each task where gloves are to be worn.

Other skin and body protection

Wear appropriate clothing to prevent reasonably probable skin contact.

Hygiene measures	Use engineering controls to reduce air contamination to permissible exposure level. No specific hygiene procedures recommended but good personal hygiene practices should always be observed when working with chemical products.
Respiratory protection	No specific recommendations. Respiratory protection may be required if excessive airborne contamination occurs.

## 12.6. Other adverse effects Other adverse effects Not determined. SECTION 13: Disposal considerations 13.1. Waste treatment methods General information Avoid the spillage or runoff entering drains, sewers or watercourses. Waste should be treated as controlled waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. When handling waste, the safety precautions applying to handling of the product should be considered. DO NOT reuse containers containing residual product without commercial cleaning Waste class When this material, in its liquid state, as supplied, becomes a waste, it is categorised as a hazardous waste, with code 08 01 11\* (EPOXY BASED LIQUID WASTE). Part-used containers, not drained and/or rigorously scraped out and containing residues of the supplied material, are categorised as hazardous waste, with code 08 01 11\* (EPOXY BASED LIQUID WASTE). Ideally this component should be mixed with the appropriate hardener and allowed to react fully to produce a solid waste. Neutralised empty packages, are categorised as nonhazardous waste, with code 15 01 02(plastic packaging) or 15 01 04 (metal packaging) SECTION 14: Transport information General This product is packed in accordance with the Limited Quantity Provisions of CDGCPL2, ADR and IMDG. 14.1.
