Welcome to our World of Manufacturing Excellence

At Palatine Paints, we pride ourselves on our rich heritage and unwavering commitment to manufacturing excellence. As a SME enterprise, we have carved out a niche foothold in the paint manufacturing industry, delivering high-quality products and exceptional service to our customers. Our journey began in the 1940s with the establishment of our first manufacturing facility in Leigh, Lancashire. Over the decades, we have evolved and expanded, embracing innovation and sustainability while maintaining our core values of quality and customer satisfaction.

Expertise in Paint Manufacturing

Our expertise in paint manufacturing is built on a foundation of extensive experience and a deep understanding of the industry. We specialise in producing a wide range of paints and coatings, including industrial, decorative, and maintenance coatings. Our product portfolio includes everything from high-performance paints and primers to specialised coatings for specific applications. Each product is meticulously formulated to meet the highest standards of performance, durability, and environmental safety.

Innovation and Quality Control

Innovation is at the heart of our manufacturing process. We invest heavily in research and development to stay ahead of industry trends and meet the evolving needs of our customers. Our team of in-house chemists works tirelessly to develop new formulations and improve existing products. We leverage advanced technologies and state-of-the-art equipment to ensure that our paints and coatings deliver superior performance and reliability. Quality control is a critical aspect of our manufacturing process. We adhere to stringent quality assurance protocols at every stage of production, from raw material selection to final product testing. Our commitment to quality is reflected in our ISO 9001 certification, which underscores our dedication to maintaining the highest standards of manufacturing excellence.

Sustainability and Environmental Responsibility.

At Palatine Paints, we recognise the importance of sustainability and environmental responsibility. We are committed to minimising our environmental footprint through sustainable manufacturing practices and the development of eco-friendly products. Our efforts include the use of low-VOC (volatile organic compounds) formulations, recycling initiatives, and energy-efficient production processes. We continuously seek ways to reduce waste, conserve resources, and promote a greener future for our industry.

Customer-Centric Approach

Our customers are at the centre of everything we do. We take pride in building long-lasting relationships with our clients, understanding their unique needs, and providing tailored solutions. Our customer-centric approach extends beyond product quality to include exceptional service and support. We offer technical assistance, product training, and after-sales service to ensure that our customers achieve the best possible results with our products.

Community Engagement and Social Responsibility

As a conscientious business, we are deeply rooted in our local community. We believe in giving back and supporting the communities where we operate. Our social responsibility initiatives include charitable contributions, community outreach programs, and support for local schools and organizations. We are committed to making a positive impact and fostering a sense of community and shared purpose.

Floors & Walls

Carbotread Polyurethane Floor Paint

A hard-wearing, single-pack floor paint, it provides a tough, durable, and easy-to-clean finish, ideal for internal floors. Perfect for warehouses, commercial, and domestic garages, this floor paint offers high performance and visual appeal.

Suitable Substrates: **Mature Concrete - Wood - Metal**

Colours: B W LG MG AG DG LBG MBL TR SY TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method Method

Carbotread Exterior Floor Paint

A polyurethane floor coating designed for use on outdoor surfaces. Provides a durable satin finish to the floor that is resistant to the effects of weather and sunlight. The paint also protects the floor from long term wear caused by everyday foot traffic.

Suitable Substrates: **Mature Concrete - Wood - Metal**

Colours: B W LG MG ADG DG LBG MBL TR SY TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method Method

Garage Floor Paint

An oil based floor coating, which offers durability and a high-performance finish. Making it ideal for both commercial and residential use. Perfect for protecting and enhancing your garage floors and ensuring long-lasting protection and easy maintenance

Suitable Substrates: **Mature Concrete - Metal**

Colours: B W LG MG ADG DG LBG MBL TR SY TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method Method

Floors & Walls

Floor Paint for Wood

An alkyd paint designed for use on wooden floors. It provides a decorative satin finish to the floor while protecting it from the everyday wear of foot traffic. A resin rich coating, suitable for both indoor and outdoor use

Suitable Substrates: **Bare Wood - Floor boards - Hardwood**

Colours:

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method 

Polyurethane Floor Varnish

Achieve a hard, protective, finish with our polyurethane floor varnish. Easy to apply, it's perfect for coating, touch-ups, and restoration projects. Providing a tough, durable finish ideal for med - high traffic areas

Suitable Substrates: **Bare Wood - Floor boards - Hardwood**

Colours:

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method 

Two Pack Epoxy Floor Primer

Designed for concrete and exposed steel reinforcement before applying epoxy floor paint. It offers excellent adhesion, low viscosity for easy application, and great penetration properties. With low odour, it's ideal for food factories, creating a durable base for epoxy floor paint.

Suitable Substrates: **Concrete - Steel**

Colours:

Finish:

Size: Curing Type:

Traffic Times (Hrs): Light Full Full Cure

Coverage: Application Method 

Floors & Walls

Two Pack Epoxy Floor Paint

Durable, high-performance coating for industrial and commercial floors. It offers hygienic, easy-to-clean surfaces with good chemical and abrasion resistance. Withstands mid - heavy traffic. Ideal for laboratories, factories, showrooms, schools, and food processing areas.

Suitable Substrates: **Concrete - Steel**

Colours: LG MG DG TR

Finish:

Size:

Application
Method

Floors & Walls

Acid Etch for Concrete

Acid Etch for Floors is a solution that prepares floors for painting fresh concrete that is less than six months old. Surface alkalinity needs to be neutralised by etching. This is down to the fact that high alkalinity is not ideal for single pack alkyd based paints. surface.

Size:

Features & Uses:

Main purpose is to remove surface laitance, (which is a fine layer that forms after the floor cures).

Creates a porous substrate better known as a "key" for the paint to fully adhere to the floor that does not easily peel away from the surface.

Epoxy Concrete Patch Repair System

Ideal for repairing worn, cracked, and damaged concrete. It offers good abrasion and chemical resistance and comes in pre-weighed packs. Provides a non-skid, abrasive-resistant surface and resists dilute acids, petrol, oil, and grease

Suitable Substrates: **Concrete**

Colours: ☐ G

Finish:

Size:

Traffic Times (Hrs): Light Full Full Cure

Coverage: Application Method   

Coldcrete Epoxy Patch Repair System

Epoxy Patch Repair System for use in the repair of worn and damaged concrete where a high strength repair material is required in cold store areas as low as - 40 °C or when temperatures do not permit the use of Epoxy Concrete Patch Repair System.

Suitable Substrates: **Mature Concrete - Wood - Metal**

Colours: ☐ G

Finish:

Size:

Traffic Times (Hrs): Light Full Full Cure

Coverage: Application Method   

Floors & Walls

Carboline Road Line Paint

A fast-drying paint known for its exceptional durability. Ideal for marking walkways, safety routes, parking bays, and restricted zones. Easy to apply when marking out walkways, safety routes, parking bays, or restricted areas

Suitable Substrates: **Mature Concrete - Steel - Road Surfaces**

Colours:   
B W Y

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method  

Line Marking Solutions

Linemarking spray, applicators and stencils provide precise, durable markings for sports fields, parking lots, and industrial areas. Easy to use, they ensure clear, long-lasting lines with quick-drying, weather-resistant paint.

Epoxytread Single Pack Floor Paint

Ideal for various industrial applications. It offers good adhesion and flexibility, with improved resistance to water, chemicals, oils, and greases. Suitable for interior and exterior concrete and light to medium foot and wheeled traffic.

Suitable Substrates: **Mature Concrete - Wood - Metal**

Colours:

Introducing StoneGuard ProSealer

The Ultimate Stone Sealer for Long-Lasting Protection & Beauty

Protect. Enhance. Preserve.

StoneGuard ProSealer is a 100% water-based, durable, and transparent surface treatment designed to protect and enhance a wide range of building materials:

- Natural Stone
- Marble
- Terra Cotta
- Concrete
- Bricks & Block Paving

Why Choose StoneGuard ProSealer?

- Exceptional Water & Oil Repellence
- Keeps surfaces safe from rain, cooking oils, and more.
- Powerful Anti-Stain Technology
- Resists stains from olive oil, coffee, ketchup, and food waste.
- Easy to Clean
- Dirt and spills wipe away effortlessly—no harsh chemicals needed.
- Anti-Graffiti Protection
- Ideal for public spaces and high-traffic areas.
- Fast Drying
- Dries in under 3 hours for quick and efficient application.
- Eco-Friendly
- 100% water-based formula—safe for you and the environment.

Product Details:

StoneGuard Stone Sealer, the ultimate solution for protecting and enhancing the beauty of your building materials. This 100% water-based, durable, and transparent surface treatment is specifically designed for natural stones, terra cotta, concrete, bricks, block paving and especially marble. With its advanced formulation, StoneGuard ProSealer offers a range of exceptional features that make it the ideal choice for both residential and commercial applications.

One of the standout features of StoneGuard Stone Sealer is its excellent water and oil repellences. This innovative sealer creates a protective barrier that prevents water and oil from penetrating the surface, ensuring that your substrates remain pristine and free from damage. Whether it's rainwater, cooking oils, or other liquids, you can trust StoneGuard ProSealer to keep your surfaces safe and dry.

In addition to its water and oil repellence, it boasts excellent anti-stain properties. This means that common household stains, such as olive oil, seed oil, coffee, ketchup, and mustard, are no match for this powerful sealer. The treated surfaces are highly resistant to staining, making it easier than ever to maintain a clean and attractive appearance.

Floors & Walls

Carbodeck UV Complete Decking Oil

Our Decking Oil has a rich, flexible resin that prevents blistering and flaking. Containing unique UV absorbers that protect the surface and prevent harmful damage to the surface. The penetrating oils soak deep into the wood which helps to prevent twisting and cracking.

Suitable Substrates: **Bare Wood - Decking boards - Hardwood**

Colours: CL B 60 59 58 57 56 48 38 20 TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method

Carbodeck UV Complete Decking Paint

Carbodeck UV Complete Decking Paint is a tough, durable polyurethane oil based coating for the decoration and protection of old & new timber deck boards, spindles and most exterior woodwork.

Suitable Substrates: **Bare Wood - Decking boards - Hardwood**

Colours: CL B 60 59 58 57 56 48 38 20 TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method

Garden Furniture Paint

An oil based decorative topcoat, designed to paint a variety of garden furniture, such as outdoor chairs, tables and benches including wooden and metal furniture. It provides long term protection and greater opacity compared to many water based alternatives.

Suitable Substrates: **Wood - Metal**

Colours: B W AG SG LI SB PB G TG4 GG TINT

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method

Home & Outdoor

Alkali Resisting Primer

A low odour, oil based wall primer designed for use on interior and exterior masonry surfaces that may contain alkalis. It prevents alkalis from attacking the topcoat, avoiding visible damage from occurring on the surface. It can also be used as a sealer or stabiliser.

Suitable Substrates: **Lime plaster - Cement Rendering - Concrete block - Stone - Blockwork**

Colours: ☐

W

Finish: ☐ Matt

Size: ☐ 1L ☐ 2.5L ☐ 5L

Drying Times: Touch ☐ 3hr Hard ☐ 16hr Overcoat ☐ 24hr

Coverage: ☐ 12-14m²/L

Application
Method

Silicone Water Repellent

Prevents water penetration on masonry. Creates a breathable membrane as can be seen by moisture evaporates & water cannot penetrate. Silicone water repellent as a result is not affected by UV light. For exterior use only.

Suitable Substrates: **Masonry-Brick-Stone-Concrete- Rendering**

Colours: ☐

Teamac Marine Paints offers a comprehensive range of high-quality coatings designed for marine environments. Their products include marine-grade varnishes, topcoats, undercoats, primers, antifouling paints, and bilge paints.

Peelaway® Marine is a water-based antifouling remover that strips multiple layers of coatings in one go. It includes a poultice blanket to reduce contamination, suitable for GRP, wood, steel, and concrete hulls.

Brushes

Rodo paint brushes are known for their high quality and durability, making them a favourite among professionals and DIY enthusiasts alike. They offer a wide range of brushes suitable for various painting tasks, ensuring excellent coverage and a smooth finish

Extension Poles

Extension poles are versatile tools designed to extend your reach for painting, cleaning, and other tasks. Made from lightweight materials with fixed and adjustable poles available. Making them ideal for high walls, ceilings, and hard-to-reach area

Frames

Roller and double arm frames are essential tools for painting large surfaces efficiently.

Roller frames: Hold the roller sleeve and come in various sizes.

Double arm frames: Provide extra stability and are ideal for heavy-duty task

Preparation & Sundries

Proper preparation is key to a successful painting project. Here are some essential preparation tools. Dust sheet rolls to protect floors and furniture. Tape, for clean edges and protecting trim. Abrasives to smooth surfaces for better paint adhesion. Scrapers to remove old paint

Roller Sleeves

Roller sleeves are crucial for a smooth paint finish. Available in various materials and pile lengths. Short pile: For smooth surfaces. Medium pile: For semi-smooth surfaces. Long pile: For rough surfaces

Trays & Scuttles

Plastic trays and scuttles are durable and versatile tools for painting projects. Made from strong, rigid plastic, they are designed to hold large quantities of paint, making them ideal for use with rollers. These trays and scuttles are perfect for both professional and DIY use

Peelaway Paint Remover is a powerful, heavy-duty product designed to strip multiple layers of paint and varnish in a single application. It is effective on various surfaces, including wood, brick, stone, and metal, and is particularly useful for removing old, lead-based paints

Paint Panther is a fast-acting, non-drip paint and varnish remover. It effectively strips multiple layers of coatings, including metal and hammer paints. Its gel consistency makes it ideal for vertical surfaces and intricate areas

Rust Treatment

Rust Treatment designed to remove rust quickly and effectively from various metal surfaces. It is reusable, non-flammable, and safe to handle, making it ideal for multiple treatments. This product is perfect for restoring rusted metal without the need for scrubbing or sanding

Fast Dry Metal Primer

Fast dry metal primer is an anti corrosive, quick drying, solvent based metal primer undercoat for ferrous metals. Recommended for spray application. Gives excellent protection to your surface before application of Fast Dry Gloss top coat.

Suitable Substrates: **Metal - Iron - Steel**

Colours:    
B W G R

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method   

Anti-Corrosive Metal Primer

An anti corrosive zinc phosphate metal primer. Based on alkyd resin and contains modified zinc phosphate and binding pigments. This means that long term protection is provided. An ideal choice for metal gates, metal doors, architectural ironwork etc.

Suitable Substrates: **Wood - Metal - Iron - Steel**

Colours:

Special Use

Zenova IP Insulating Paint

Thermal insulating paint designed to optimize thermal management and conserve energy. It reduces heat transfer, reflects solar rays, and helps maintain indoor temperatures, making it ideal for residential, commercial, and industrial applications

Thermoguard Safewood

Thermoguard SafeWood is a specialized coating system designed to provide both fire protection and anti-viral properties for wood surfaces. It includes: Anti-Viral Properties: Reduces bacteria by 99.9% in 24 hours. Durability: Suitable for both interior and exterior wood, providing a durable, weather-resistant finish

Thermoguard Safewalls

Thermoguard SafeWalls is a highly effective coating solution designed to provide both decorative finishes and enhanced fire protection for walls and ceilings. It offers: Anti-viral protection: Reduces bacteria by 99.9% in 24 hours. Durability: Forms a smooth, hard, and cleanable surface

Special Use

Pipe Identification Paint

A fast-drying, long term durable coating produced in BS 1710 industry standard colours for pipeline and pipework identification. Ensure your building is correctly identified with approved industry standard colour identification.

Suitable Substrates: **Wood - Metal**

COO-var® PAINTS, PRIMERS AND SPECIALISED COATINGS

Anti-Graffiti Paint: A two-pack clear polyurethane coating that resists graffiti, making it easy to clean and durable. Vandeline Paint: A non-drying, sticky anti-climb paint that deters intruders by creating a slippery surface. Glocoate Paint: High-visibility fluorescent paint effective in daylight and under lights at night, ideal for marking hazards and safety equipment. Luminous Paint: Glows in the dark after exposure to light, perfect for marking emergency exits and escape routes.

Solvents

Carbosolv Low Odour White Spirit

Low Odour White Spirit is ideal as a thinner for traditional oil based paints and varnishes. It can also be used as a general cleaning and degreasing agent. Can be used with a wide range of paints and wood finishing products.

Size: 1L 2.5L 5L 25L 205L

Compatible coatings:

Carboxide Primer & Undercoat
ProFinish Gloss / Satin / Matt
ProFinish Wood Paints – ProFinish Exterior Gloss
Plant & Machinery – Shed & Fence

Carbosolv Multi Purpose Thinners

Ideal for diluting fast dry and hammer finish paint for use in spray guns. Can also be used for cleaning equipment after use. When thinning for spraying please refer to the technical data sheet of the relevant paint. This will offer guidance in order to dilute at the correct ratio.

Size: 1L 2.5L 5L 25L 205L

Compatible coatings:

Fast Dry Metal Primer
Fast Dry Gloss & Fast Dry Semi Gloss
Chlorinated Rubber Paint
Pond Paint
Hammershield

Carbosolv Standard Thinners

Standard thinners are a blend of recycled solvents commonly used for thinning cellulose paints and cleaning spray guns. They are versatile and effective in reducing the viscosity of various coatings, making them easier to apply.

Size: 1L 2.5L 5L 25L 205L

Features & Uses:

Excellent for cleaning spraying equipment
Cost effective solution for thinning paint

Solvents

Carbosolv Xylene Thinners

Xylene paint thinner is a versatile solvent widely used in the painting and coatings industry. Known for its effectiveness in thinning oil-based paints, varnishes, and enamels. A clear and colourless liquid, is characterized by its strong dissolving power.

Size: ☐ 1L ☐ 2.5L ☐ 5L ☐ 25L ☐ 205L

Compatible coatings:

Fast Dry Metal Primer
Fast Dry Gloss & Fast Dry Semi Gloss
Chlorinated Rubber Paint
Pond Paint
Hammershield

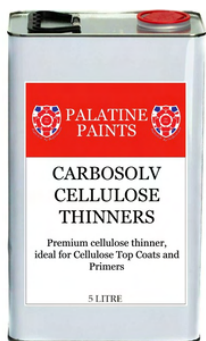

Carbosolv Gun Wash

Gun wash is a powerful solvent blend specifically designed for cleaning spray guns and painting equipment. It effectively removes paint residues and ensures that spray equipment remains in optimal working condition

Size: ☐ 25L

Features & Uses:

Quickly dissolves and removes paint residues from spray guns and tools
Often less flammable than other solvents like acetone, making it safer to use in certain environments
Suitable for various types of paint and equipment

Carbosolv Cellulose Thinners

Cellulose thinners, also known as lacquer thinners, are a mixture of solvents designed to dissolve cellulose-based paints, lacquers, and varnishes. They are commonly used in automotive and woodworking applications to achieve a smooth, high-gloss finish

Size: ☐ 1L ☐ 2.5L ☐ 5L ☐ 25L ☐ 205L

Features & Uses:

Anti Bloom properties.
For use as a high performance cleaner before working on surfaces to obtain the best possible finish.
Recommended for thinning cellulose based primers and topcoats

Solvents

ProXL Panelwipe Degreaser

Effectively removes contaminants like dirt, grease, oil, and more from surfaces. Its non-aggressive formula is safe for bare metal and pre-painted surfaces. It ensures a clean, static-free surface ready for painting

Size: (5L)

Features & Uses:

Suitable for use over bare metal surfaces as well as existing paint surfaces.

Available in slow, fast, and extra fast evaporation times

Also in Aerosol form

Helps to remove static charge from surfaces

Formulated to avoid attacking existing paint films

Ideal for larger areas

ProXL Water Based Degreaser

An eco-friendly solution that effectively removes silicone, grease, wax, dirt, and more. Safe for old paintwork, bare metal, and plastics, it ensures a clean, static-free surface ready for painting. Easy to apply and non-aggressive on surfaces

Size: (5L)

Features & Uses:

Suitable for old paintwork, bare metal and plastic surfaces

Effectively removes grease, silicone, waxes and dirt, including tree resin and other contaminants

Reduces the organic solvent impact on the environment

Can be applied with a pump sprayer or cloth

Isopropyl Alcohol (IPA) 99.9%

A versatile cleaner and disinfectant, ideal for removing oils, greases, and residues. It evaporates quickly, leaving no residue, and is suitable for electronics, surfaces, and medical use. Colourless, odourless, and highly effective, it ensures thorough cleaning and disinfection.

Size: (1L) (2.5L) (5L) (25L) (205L)

Features & Uses:

Removes oils, greases, and residues

Leaves no residue.

Suitable for electronics, surfaces, and medical use

Easy to use without strong smells

Cleans engine parts, windshields, and other surfaces, effectively removing grease and oil

Solvents

Carbochem Cement Remover

Carbochem Cement Remover contains an organic, naturally occurring, plant based active ingredient that is excellent at breaking down bonds, dissolving and releasing hardened cement from common construction site surfaces.

Size: 5L

Features & Uses:

Efficient, fast acting and highly effective at penetrating and removes concrete spills, waste and mortar.

Effectively dissolves hardened cement, mortar, and grout from tools, mixers, and other construction equipment

Removes cement residues from floors, walls, tiles, and other surfaces, making them ready for further treatment or painting

Carbowash Acid Brick Cleaner

Carbowash Acid Brick Cleaner is a strong hydrochloric acid cleaner that removes stains, limescale and dirt. It is suitable for surfaces including brick, concrete, paving, scaffolding and tools.

Size: 5L 25L

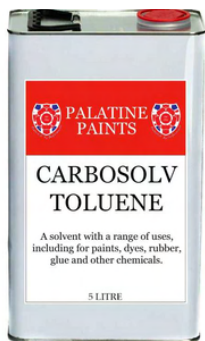

Features & Uses:

Effectively cleans off mortar smears from newly constructed brick walls

Removes white, powdery deposits caused by water-soluble salts on brick surface

Ideal for cleaning fireplace surrounds and exterior brick walls affected by pollution

Effective in eliminating rust stains from brick and masonry

Carbosolv Toluene

A clear, colourless liquid with a distinctive smell, commonly used as an industrial solvent. Also known as toluol, with numerous uses in the chemical and manufacturing industries. Known for its effectiveness, toluene solvent is widely utilized in chemical reactions.

Size: 1L 2.5L 5L 25L 205L

Compatible coatings:

Compatible Oil Based Paints

Features & Uses:

Paint Thinning, it helps achieve smooth, even finishes by dissolving paint and varnish

Excellent at dissolving a wide range of organic compounds, ideal for use with adhesives, and inks

Solvents

Carbosolv Methylated Spirits

Also known as denatured alcohol, is a versatile solvent commonly used for cleaning, degreasing, and as a fuel for alcohol burners. It consists mainly of ethanol mixed with additives to make it unfit for consumption.

Size:

Features & Uses:

Excellent for cleaning glass, metal, and other surfaces.

Used in camping stoves and alcohol burners.

Antiseptic properties, can be used for disinfecting surfaces.

Carbosolv Acetone

Pure 99.7 % Acetone. A colourless, flammable liquid with a powerful smell that breaks down & dissolves other substrates easily. With its many uses such as paint remover, heavy degreasing job to nail polish remover Acetone is a popular product.

Size:

Compatible coatings:

Compatible Oil Based Paints

Features & Uses:

Clean and degrease surfaces, including electronics and laboratory equipment

Paint thinning with compatible oil-based paints and cleaning painting tools

Sodium Hypochlorite 15%

Sodium hypochlorite 15% is a potent solution commonly used for disinfection, bleaching, and cleaning. It is highly effective in killing bacteria, viruses, and fungi, making it a popular choice for sanitising surfaces and treating water

Size:

Features & Uses:

Suitable for use in household cleaning, industrial applications, and water treatment

Removes stains and whitens fabrics and surfaces

Perfect for the maintenance of swimming pools

Can be used for odour Removal

Solvents

Alkalinity Reducer

Alkalinity Reducer is used primarily to reduce the pH level of alkaline substances in swimming pool or spa water. If an Alkaline Reducer isn't used in high pH water then problems such as cloudy water and scaling of surfaces, including pipework will occur.

Size: (25L)

Features & Uses:

In swimming and paddling pools to maintain balanced water chemistry, ensuring the pH remains stable and preventing issues like cloudy water and scaling.

For aquariums, to create a suitable environment for aquatic life by maintaining appropriate alkalinity levels

Premium Liquid Paraffin

Premium Liquid Paraffin is a premium C1 grade paraffin (sometimes also referred to as Kerosene). Commonly used for domestic paraffin heaters and greenhouse heaters, this is a high heat and clean burning paraffin, making it ideal for this use.

Size: (5L)

Features & Uses:

Widely used in portable heaters and central heating systems to provide warmth in homes and industrial settings

Commonly used in lamps and lanterns

Effective solvent for cleaning machinery and degreasing equipment

Paraffin is also a cleaning fluid for automotive parts, as well as a lubricant in machinery and mechanical equipment.

Barrettine Premium Liquid Paraffin

C1 Grade Paraffin and Kerosene has many uses. The most popular being a fuel for domestic paraffin heaters and greenhouse heaters. This paraffin is a clean burning high heat output paraffin refined to BS2869C1

Size: (4L)

Features & Uses:

Widely used in portable heaters and central heating systems to provide warmth in homes and industrial settings

Commonly used in lamps and lanterns

Effective solvent for cleaning machinery and degreasing equipment

Paraffin is also a cleaning fluid for automotive parts, as well as a lubricant in machinery and mechanical equipment.

Caustic Soda Micropearl

High-Purity Sodium Hydroxide for Industrial Excellence

Powerful. Precise. Professional.

Caustic Soda Micropearl (Sodium Hydroxide) is a highly effective, 99% pure, and easy-to-handle alkali used across a wide range of industries:

- Textile Processing
- Soap & Detergent Manufacturing
- Water Treatment
- Pulp & Paper Production
- Chemical Manufacturing
- Alumina Refining

Key Features & Benefits

- High Purity (99%)
 - Delivers maximum chemical effectiveness.
- Versatile Applications
 - Ideal for pH adjustment, neutralization, and cleaning.
- Micropearl Form
 - Reduces dust, improves handling, and ensures precise dosing.
- Powerful Cleaning Agent
 - Cuts through grease, grime, and industrial residues.
- Long Shelf Life
 - When stored properly, retains potency over time.

Product Details:

Caustic Soda Micropearl, also known as sodium hydroxide, is a versatile and strong alkaline substance essential for pH adjustment, neutralization, and cleaning in various industries. Available in micropearl form for easy handling and precise application.

Caustic Soda Micropearl, a highly corrosive alkali widely used across numerous industries. This product is available in micropearl form, created through the evaporation of water from its liquid state followed by solidification into pearls. These micropearls offer strong alkalinity and are ideal for applications such as pH adjustment, neutralization, and effective cleaning.

Benefits:

- Efficient Handling: Micropearl form ensures uniform feeding and easy application.
- Cost-Effective: High purity and strong performance reduce the amount needed for effective results.
- Extended Shelf Life: Proper storage extends product usability.

Please note: this product can only be used for professional and industrial applications. Purchasing products for professional use only, by purchasing you are acknowledging that you are a professional user and are not purchasing for the general public

Solvents

Calcium Chloride Flake 77 – 80%

Calcium Chloride Flake is a compound used across a wide range of industries, including the Chemical, Manufacturing and Pottery industries. It has a number of different uses, such as dust control and as an agent to remove moisture.

Size: (5Kg) (10Kg) (15Kg) (25Kg)

Features & Uses:

Calcium Chloride is a key component within the pottery industry to aid the application of glazes to non porous surfaces such as bisque porcelain.

Dust control, helps to suppress dust on unpaved roads by keeping the surface moist

Soda Ash – Sodium Carbonate

Also known as Sodium Carbonate is a white, odourless powder that is highly soluble in water. It is commonly used in various industrial and domestic applications due to its alkaline properties. Used in a wide range of industries, including glass manufacturing,

Size: (5Kg) (10Kg) (25Kg)

Features & Uses:

Uses within the pottery industry as well as various other industries. Its primary use within the pottery industry is as a deflocculant, reducing the viscosity of the clay slip. This allows the clay to be more easily poured and manipulated without increasing the water content of the slip.

Used to soften water and adjust pH levels

Sodium Silicate C100 | C140 | NS75

Sodium Silicate is a chemical used in a variety of industries, and a wide range of applications, from adhesives and detergents to water treatment and construction. Also known as water glass or liquid glass, and is a viscous alkaline liquid.

Size: (5L) (10L) (20L) (205L)

Features & Uses:

In car exhaust and head gasket repair, sand casting and as a component in drilling fluids.

It is also used as an adhesive in the production of cardboard and when bonding glass.

In the pottery industry, sodium silicate is mainly used as a deflocculant during the preparation of casting slips.

Solvents

Premium Ice Melt

Highly effective de-icing agent that works by absorbing moisture from the environment, which helps it to quickly melt ice and snow. It is commonly used in both residential and commercial settings to ensure safe, ice-free surfaces

Size: 5Kg 10Kg 15kg 25Kg

Features & Uses:

Driveways and Sidewalks, to prevent slips and falls by melting ice and snow

Suitable for use on roadways

Melts ice faster than many other ice melt products

Effective at temperatures as low as -32°C

White Rock Salt 20KG

A 20KG bag of white rock salt. Ideal for roads, path and driveways, it keeps surfaces clear of snow and ice. The rock salt helps to keep areas accessible and safe, which is especially important in working environments and public areas. White rock salt is cleaner than brown, which makes it ideal for areas that lead indoors. The salt works quickly to remove ice and snow to create a safe path for both foot and vehicle traffic.

Size: 20kg

Features & Uses:

The brown colour makes it easy to see on treated surfaces, reducing the risk of over-application

Works well at melting ice and snow, providing good traction on slippery surfaces

Generally cheaper than white rock salt due to its abundance

Brown Rock Salt 20KG

A 20KG bag of premium brown rock salt. Ideal for roads, path and driveways, it keeps surfaces clear of snow and ice. The rock salt helps to keep areas accessible and safe, which is especially important in working environments and public areas. Brown rock salt is more cost effective than white, making it ideal for larger areas or places that are more likely to be affected by ice or snow.

Size: 20kg

Features & Uses:

The brown colour makes it easy to see on treated surfaces, reducing the risk of over-application

Works well at melting ice and snow, providing good traction on slippery surfaces

Generally cheaper than white rock salt due to its abundance

Vehicle Refinishing

Chassis, Vehicle & Military Paint

A tough durable coating, designed to provide your vehicle chassis and bodywork with a protective decorative coating. Making our chassis paint ideal for vehicle restorations.

Vehicle Refinishing

Indura 2k Epoxy Primer

Indura 2K Epoxy High Build Primer is a premium quality Epoxy Metal Primer for Commercial and Industrial applications. Ideal as a base coat for commercial vehicles and Standard corrosion protection systems for buildings

Features & Uses:

- Epoxy – Polyamide with activated zinc phosphates
- High etching adhesion
- High resistance to chemicals
- Smooth finish
- Good chemical and mechanical resistance
- Achieves Standard systems for C rated environment categories

Indura 2k Acrylic PU Gloss

Indura two pack gloss designed to have good weather resistance and colour retention. It is ideal for use on surfaces constantly exposed to weather and dirt, such as bodywork on commercial vehicles

Features & Uses:

- Weather Resistance: Suitable for outdoor applications.
- Durability: Provides a long-lasting finish.
- Fast Drying: Speeds up the application process.
- Versatile Application: Can be applied using conventional or airless spray methods
- Commercial Bodywork
- Industrial Structures

2k Scratch Resistant Clearcoat

Scratch Resistant 2K Clearcoat is a 2 pack automotive clear coat for use over base coats. It provides the surface with scratch resistance and can be overcoated within 24 hours if a further coat is desired

Features & Uses:

- Offers excellent scratch resistance, enhancing the durability of the surface.
- Provides strong adhesion to both waterborne and solvent base coats.
- Extremely stable when applied on vertical surfaces.
- Can be overcoated within 24 hours without additional sanding.
- Theoretical coverage of 8-9 m² per litre at 50 microns dry film thickness

Vehicle Refinishing

ProXL offers a comprehensive range of aerosol products designed for automotive and industrial applications. Key products include:

PlastiColour: A fast-drying coloured coating for plastics.

Bumper Spray: Designed for repairing and refinishing plastic bumpers.

Stonechip Spray: Provides durable protection against stone chips and corrosion

ProXL offers a comprehensive range of aerosol products designed for automotive and industrial applications. Key products include

2K Repair: A high-performance repair filler.

2K Primer: Offers superior adhesion and corrosion resistance

INDASA

Indasa offers a variety of high-quality aerosol products designed for automotive and industrial applications. Key products include: Acrylic Gloss Black: Provides a durable, glossy finish.

Clearcoat: Delivers a protective, clear finish. High Build Primers, available in various colours for excellent adhesion and coverage

Wood Care

Cedar Wood Treatment

Seals rough, sawn, or smooth timber, reducing decay, swelling, and twisting. Its UV-resistant pigments protect wood from UV damage, making it ideal for outdoor structures like sheds, fences, trellises, pergolas, and gazebos. Transparent/translucent finish

Suitable Substrates: **Wood**

Colours:

C

Finish:

Size:

Drying Times: Touch Hard Overcoat

Coverage: Application Method 

Boiled Linseed Oil

Boiled linseed oil, blended with driers for faster drying, comes from ripened flax seeds. Used for centuries, it penetrates unsealed wood, providing a natural, water-resistant, protective finish that darkens slightly with age.

Suitable Substrates: **Wood-Terracotta Tiles-Concrete-Stone**

**** Not suitable for oak**

Finish:

Size:

Drying Times: Overcoat

Coverage: Application Method 

Raw linseed Oil

A natural flax seed oil that penetrates unsealed wood, providing a water-resistant finish with a slightly enhanced colour that darkens with age. Ideal for oak beams, canes, cricket bats, woodcraft, and as a lubricant in French Polishing (not for furniture or flooring).

Suitable Substrates: **Wood Finishing- Painting-Concrete-Stone-Food/Toy safe when dry, certified by EN 1186:2002 & EN71:3**

Finish:

Size:

Drying Times: Overcoat

Coverage: Application Method 

Wood Care

Teak oil

Barretline Teak Oil enhances and protects outdoor wood, providing a rich, natural finish. It penetrates deeply to nourish and preserve, offering UV resistance and water repellency. Water resistant finish

Suitable Substrates: **Wood - Teak - Hardwood - Cedar - Iroko**

**** Not suitable for Oak**

Size: ☐ 1L ☐ 2.5L ☐ 5L ☐ 25L

Features & Uses:

Outdoor Furniture
Wooden Boat Decks
Interior Woodwork
Exterior Woodwork

Danish oil

Barretline Danish Oil is a blend of rich oils, including Tung Oil, that enhances and protects wood surfaces. It provides a low-lustre, natural finish with high water repellency. Ideal for doors, furniture, and wood turning projects, both indoors and sheltered outdoors.

Suitable Substrates: **Wood - Teak - Hardwood - Cedar - Iroko**

**** Not suitable for Oak**

Size: ☐ 1L ☐ 2.5L ☐ 5L ☐ 25L

Features & Uses:

Furniture
Wooden Utensils
Doors & Trims
Wood Turning
Sheltered Exterior Wood

Garden Furniture Oil

Barretline Garden Furniture Oil is a natural blend of clear oils and resins that penetrates unsealed wood, leaving a beautiful, water-resistant finish. Ideal for outdoor furniture, it nourishes, protects, and reduces greying. Treat annually to maintain appearance.

Suitable Substrates: **Wood**

Size: ☐ 1L

Features & Uses:

Protecting and enhancing all types of garden furniture.
Nourishing and preserving unsealed wood.
Providing a natural, water-resistant finish.
Reducing the greying appearance

Wood Care

General Purpose Varnish

General purpose varnish which provides a tough, durable gloss finish. It can be used over bare wood and previously painted, stained or varnished surfaces. Oil based varnish for both internal and external work

Suitable Substrates: **Wood - Metal**

Colours: ☐

CL

Finish: ☐ Gloss

Size: ☐ 1L ☐ 2.5L ☐ 5L

Drying Times: Touch ☐ 3hr Hard ☐ 8hr Overcoat ☐ 24hr

Coverage: ☐ 12-14m²/L Application Method    

Polyurethane Gloss Varnish

Polyurethane gloss varnish is a durable finish, which seals and protects a wide range of surfaces. With a wide range of properties it protects your wood work from knocks, heat, scratches and chemical spills. Use to brighten up colours and protect wooden surfaces

Suitable Substrates: **Wood - Stone - Slate - Concrete**

CL

Finish: ☐ Gloss ☐ Satin

Size: ☐ 1L ☐ 2.5L ☐ 5L

Drying Times: Touch ☐ 3hr Hard ☐ 8hr Overcoat ☐ 24hr

Coverage: ☐ 12-14m²/L Application Method    

Floor Varnish

High-quality floor varnishes like the Quick Drying Floor Varnish and Coovar Polyurethane Floor Varnish. These products provide excellent protection, durability, and a beautiful finish for wood floors

Wood Care

Waxes & Lacquers

Barrettine provides premium waxes and sealers designed to protect and enhance wood surfaces. Suitable for both indoor and outdoor applications, their products offer long-lasting durability, a beautiful finish, and help maintain the natural beauty of wood. Ideal for furniture, floors, and more.

Polishes & Shellacs

Barrettine offers a range of high-quality polishes and shellacs designed to protect and enhance wood surfaces. Their polishes provide a smooth, glossy finish, while their shellacs offer a durable, protective coating that brings out the natural beauty of the wood. Ideal for furniture, floors, and more.

Knotting Solutions

Knotting Solution is a high-quality product designed to seal knots and resinous areas in wood before painting. It prevents natural resins from seeping through and discolouring the paint finish. Suitable for both interior and exterior use, it ensures a smooth, long-lasting result

Wood Care

Wood Preservers

Barrettine Wood Preserver, a high quality, deep penetrating, low odour preserver to protect wood against wet rot and wood boring insects. Its semi transparent low sheen finish allows viewing of the natural wood texture. Ideal for use on pressure treated wood, treated timber or untreated wood

Wood Protective Treatment

Barrettine Wood Protective Treatment deeply penetrates wood, providing water repellency, UV resistance, and protection against mould and algae. Its oil-based, low-odour formula is suitable for all timber types, offering a semi-transparent finish that enhances natural wood beauty

Wood Care

Barrettine offers comprehensive wood care solutions: Woodworm Killer eradicates insects and protects timber, Wood Reviver restores weathered wood to its natural tone, and Cut End Preserver shields exposed end grain from rot and fungi

Fire Protection

Intumescent Basecoat

An intumescent basecoat is a specialized fire-retardant coating designed to expand when exposed to high heat or flames. This expansion forms a thick, insulating layer that protects the underlying substrate, such as steel or wood, from the effects of fire, significantly delaying structural failure

Fire Retardant Paint

Fire retardant paint is designed to slow the spread of flames and reduce smoke production in the event of a fire. It works by forming a protective barrier on the surface, which helps to insulate and protect the underlying material. This type of paint is commonly used on wood and metals

Fire Varnish

Thermoguard Fire Varnish is a clear intumescent varnish designed to provide fire protection for timber surfaces. Fire Resistance: Achieves BS Class 1, Class 0, and EN Class B s2 d0 standards. Suitable for both interior and exterior use, providing a tough, durable finish.

A Brief Summary of the Process When Purchasing Intumescent Paint:

Step 1.

Complete Relevant Enquiry Form: Fill out the enquiry form specific to your substrate to provide details about your project and requirements:

Steel Enquiry Form

Wood enquiry Form

Walls & Ceilings.

Step 2.

Return the Completed Form: Send the completed form back to us. We will then confirm the correct product details, and the volume required to achieve the requested fire rating. A reference number will also be provided, which is required when requesting certification.

Step 3.

Purchase and Apply Intumescent Paint: After purchasing the recommended intumescent paint, carefully follow the manufacturer's application instructions. Ensure the recommended number of coats and film thickness are applied.

Step 4.

Apply Topcoat (if required): If needed, apply a topcoat to protect the intumescent paint from environmental factors and enhance its durability.

Step 5.

Request Fire Certification: Once the intumescent paint has been applied and dried, you can request a fire certification from Thermoguard or Nullifire.
